ABOUT ME

Passionate and detail-oriented Web Development student with over three years of experience designing and developing digital products through university and personal projects. I enjoy bridging the gap between design and development by creating intuitive, accessible, and visually engaging user experiences. Alongside my technical experience, I actively contribute to university life through multiple student leadership roles, including serving on the AIM School Council at SRH University, where I represent student interests and support academic initiatives.

PROJECTS

Web Development

Personal Portfolio Website

Designed and developed a responsive personal portfolio website using React, Vite, TypeScript, and custom CSS

App Design- Web Development

Deutsch Genie - German Learning App Website

- Designed the complete UX/UI for a mobile German learning application from concept to high-fidelity prototype.
- Designed user flows, wireframes, interactive prototypes, and over 25 mobile screens in Figma.
- Conducted UX research and developed user-centered learning experiences through interactive exercises.
- Designed and developed a responsive landing page to present the application and its learning methodology.
- Applied SEO fundamentals, including information architecture, keyword research, and on-page optimization.

App Design- App Development

CoCo – Social Media Management App [Git Repository](#)

- Designed and developed a cross-platform mobile application for social media management using Flutter and Android Studio.
- Designed the complete UX/UI, including user flows, wireframes, high-fidelity mockups, and interactive prototypes in Figma.
- Implemented responsive mobile interfaces using Flutter (Dart), focusing on clean layouts and reusable components.
- Developed core app features for content creation, post management, analytics, messaging, and account management.
- Collaborated within a multidisciplinary team throughout the full product development lifecycle, from research and ideation to implementation and testing.

App Design- UX Research

Kiddo - Online Learning Kids Platform [Figma File](#)

- Designed the complete UX/UI for a child-friendly educational mobile application.
- Created user flows, wireframes, and interactive prototypes in Figma and Protopie.
- Applied user-centered design principles to improve usability and engagement.
- Developed a consistent design system with reusable UI components and visual guidelines.
- Focused on clear navigation, age-appropriate interactions, and an engaging learning experience.

CMS- Web Development- Web Design

Front & Backend-

Content Management System (CMS) Platform – SRH Ambassadors

- Developed both the frontend and backend of a Content Management System using Joomla and Strapi
- Designed and implemented role-based access control (RBAC) with multiple user roles and permissions.
- Structured and managed multilingual content using semantic content architecture.
- Built responsive web interfaces optimized for desktop.
- Implemented content management features, including structured data storage
- Created reusable content models and user management workflows.
