PROJECTS

DeutschGenie - German Learning App

Development of a German learning app with a focus on user-friendly design and a clear content structure. Applied fundamental SEO principles to improve online visibility while combining web development with UX/UI design principles.

COCO One - Marketing-App for small businesses

Conceptualization of a marketing app for small businesses to strengthen their digital presence, including tools for content planning, customer engagement, and online growth.

Serenely - Hospice Support app for Volunteers in Shanghai

Development of a mental well-being app for student hospice volunteers, providing helpful tools, educational resources, and access to professional support to help them better manage emotional stress.
